His Appeal Dismissed by the Supreme Court.

Verdict of the Coroner's Jury in the City of Chester Disaster.

San Diego Visited by Another Great

Against Old Man Lowell's Murderers -Jadge Terry's Threats.

SAN FRANCISCO, Sept. 4.—[By the Associated Press.] The appeal of Anschlag, the Garden Grove murderer, from the lower court to the Supreme Court, was dismissed by the latter body today. Anschlag failed to file his bill of excep-

tions before the expiration of 40 days, and the case was thrown out on the Clerk's cer-tificate and on motion of the Attorney Gen-

ruins.

The building was a three-story one with basement. The first two floors were occu-pled by the wholesale grocery, liquor and o house of Klauber & Levi: the third

the fire department were the adjoining buildings saved.

About an hour after the fire started there was an explosion which injured several firemen, one being rendered unconscious for several minutes. Two firemen were overcome by heat and carried home.

The fire continued to burn until after & o'clock. The only articles saved from the building were the books of the wholes-le firm. Twenty-five thousand dollars' worth of merchandise arrived for the firm yesterday, which would have been burned but for an accident rendering. It impossible for the firm to store the goods. The firm this afternoon opened an office in another building which they have been using as a warehouse.

000. The Lake block's loss is \$00,000; Insurance, \$50,000. The law firm of Hunsaker. Britts & Lamme lost a library valued at \$29,000; insured for \$6000. Other losses will amount to \$20,000.

The block was owned by Dr. Bakesto of San José. The origin of the fire is a mystery. It was first discovered by a cierk when he opened the door this morning. The flames then, seemed to be confined to the basement. The general supposition is that the fire started in a stock of matches kept in a department either by spontaneous combustion or ignition of the matches by mice or rats.

Twenty minutes after the fire was first discovered the flames were bursting out of every window or other vent in the burning building. Within a few minutes all four walls fell with a crash, but as they all fell inward no one was hurt. By hard work the firemen succeeded in saving the surrounding buildings, with the exception of two small frame structures.

The building was built in an unsubstan-

small frame structures.

The building was built in an unsubstantial manner, and it is said that had there been a brick division wall in the back the store building would not have "ollapsed so completely. Several firemen were more or less burt during the progress of the fire, but none seriously.

Damaging Evidence Given Against

PLACENTILE, Sept. 4.—[By the Asso-ciated Press.] In the Lowell murder case today, Michael Keiser testified that on the 9th or 10th of March he was at Lowell's ranch, where he saw the deceased and de-fendants together. Lowell spoke of being offered \$300 for one of his horses, which he would not sell. Witness afterward saw Meyers and Olsen on the road with two horses and a spring wagon. On Good Friranch, but they had disappeared, as had also Lowell, and all but two head of his stock. A notice was found on the cabin-

George W. Newbert, the failer, produced and read a letter written by Myers in prison at Sacramento to his wife, wherein Myers acknowledged that he, with the other defendants, killed Lowell and stole his borres.

Other witnesses testified and the court adjourned.

California Grand Army Men Wel-comed at Portland. PORTLAND (Or.), Sept. 4.—The entire G. A. R. delegation from California arrived tonight on the overland train, en route to

Tacoma, where the Washington Territory delegation will join them.

The train will be made up at Tacoma, and will proceed direct from there to St. Paul over the Northern Pacific, and thence to Columbus. The Pacific Coast delegation numbers about 500, and will occupy 22 coaches.

On the arrival of the train here bringing the G.A.R. delegates from California they were waited upon by a large delegation from posts of this city and given a hearty reception. From the trair the visitors were escorted to G.A.R. Hall, where an informal reception was tendered them. At the close of the reception the California delegates and accompanying comrades and friends were escorted by the Portland G.A.R. men down to the train,

Verdict of the Coroner's Jury-No

One to Brame.

San Francisco, Sept. 4.—[By the Associated Press.] The inquiry into the cause of the Oceanic and City of Chester casualty was concluded today, so far as the Coroner's inquest is concerned. The jury returned the following verdict:

"The deceased, Anaie C. Heney, a native of St. John, N. B., aged 55 years, and others, came to their deaths on August 22, 1883, by means of submersion in the waters of the bay of San Francisco, the result of a collision between the steamships Oceanic and City of Chester; and we further find it impossible to place the blame on either vessel, on account of lack of expert evidence."

The Line to Templeton

SAN FRANCISCO, Sept. 4.—Speaking to the Associated Press representative, Col. C. F. Crocker of the Southern Pacific Rail-F. Crocker of the Southern Pacine Railroad said that the line from Templeton south will be extended at once to a distance of about 15 miles or to the base of the mountain. At this point a long tunnel will be necessary, and it will take something like a year to build it. The work will progress gradually in this tunnel and on the line toward San Luis Obispo at all convenient seasons.

The State Fair.
SACRAMENTO, Sept. 4.—Sacramento is rapidly filling with visitors to the State Fair. Fair. The pavilion presents a fine appearance, though the exposition is not yet fairly started. The greatest attractions are in the exhibits of products from several Northern California counties, prominent among which are displays from San Joaquin, which are probably the largest. The racing begins on Thursday.

PROF. I. N. VAIL'S LECTURE ON ITS ORIGIN AND DEPOSITS.

A Committee Appointed to Investi gate the Los Angeles Oil Region and Report on Cost of Production and Supply.

A very important meeting was held in the A very important meeting was held in the parlor of the Nadeau Hotel yesterday afternoon from 4 to 6 o'clock by some thirty gentlemen, in the interest of petroleum development in or near Los Angeles city. The occasion of the meeting was to hear a report of Prof. Isaac N. Wali of Pasadena on a well recently bored by L. H. Whitson on Boyle 'Heights. The well is 342 feet deep, and is in a formation of earth and clay down to a porous sandstone, where boring was left off. Specimens of the oil-rock from was left off. Specimens of the oil-rock from the bottom of this well were exhibited, and also a jar of the water, which had a strong

ell.
Vail hung up a chart of the United States, and gave a short and inter-sting lecture on the formation and deposit of petroleum. Carbon oil, he said, is not a product of the

esting lecture on the formation and deposit of petroleum.

Carbon oil, he said, is not a product of the rock, but is an educt, and is given out when the bituminous limestone or shale is subjected to intense heat and pressure, and, being an educt, we must look beyond the rock for its origin. On the map he pointed out the probable course of currents in the ancient seas, along which coursed primitive carbon matter had been carried and deposited in favorable localities. The distillation that gives rise to hydro-carbon from organic matter is plainly that of a miniature furnace. The process by which the carbon and hydrogen are dissociated in the fossil bed is precisely the same, except in degree of energy, which takes place in any other furnace. Geologists admit that the earth was a great smelting furnace and must have distilled the same products from the earth's mineral fund. All the carbon in the earth now was in it then. A measureless supply of allo-tropic carbons came forth from the fires of the infant earth, and hovered in the primeval atmosphere, arranged in layers according to their specific gravity. The heaviest, nearest to the earth's crust. Graphite, or the heaviest earth, and novered in the primery at anosphere, arranged in Jayers according to their specific gravity. The heaviest, nearest to the earth, was the first to return, and become incorporated in the oldest strata of the earth's crust. Graphite, or the heaviest form of carbon, is found in the oldest sedimentary deposits. In this cosmic furnace the earth was subjected to a subliming and distilling process, the products of which are to be found in the earth's crust. Plant distillation forms, hydro-carbon, which the infant earth did on an immeasurably grander scale. A distillation of organisms yields oil and gas. These carbon distillations refurned to the earth by way of the polar regions. The primitive carbons falling to the earth, were carried to the seas, and were there assorted, just as any other sediment. The oily carbons having an affinity for clay and some other impurities floating in the water united with them and sank. Vast quantities of oil thus floating on water thus disappeared and settled has been and strata. In moving water the heavier carbons would settle in local beds, and the lighter would float higher and settle on elevations in the sea-bottoms. The waters of the Gulf of Mexico once covered nearly all the United States, and washed the footabilis of the Canadian highlands. Its eastern and southern parts were the deepest, and the floating earbon could not settle so deeply as to lodge upon its floor. A great polar current descended by way of the Labrador coast, and at that point turned westward along the base of the Laurentian nills, through the St. Lawrence depression, over the region of the Great Lakes, and into the Mississippi Valley. The primitive carbon, that floated in the firmament, falling in the north polar voil, was carried by this current, which deposited its carbon carbon, that floated in the firmament, falling in the north polar world, was carried by this current, which deposited its carbon load along its margins, and we see how the facts support this claim, as shown by oil wells and gas fields in Canada and New York State, in lines parallel with the channel and extending on to the south from New York into Illinois. He then illustrated his theory with many facts and details in its support.

He then drew attention to similar operations of Nature in Southson California.

He then drew attention to similar opera-tions of Nature in South-yn California. The Pacific Ocean once wash d the Sierra Madre, whose summits were then above the water like Catalina Island is today. There was the great current coming down the coast from the p-lar regions, with a branch running around by way of Santa Barbara, over the Los Anxeles and Pasadena region toward San Bernardino, southward toward San Diego, and whirling around over the same course again like a great whirlpool. This current carried and deposited the oil, as is proved by the desouthward toward San Diego, and whirling around over the same course again like a great whirlpool. This current carried and deposited the oil, as is proved by the deposits which have been discovered. The nearer the sea the greater he thought would be the deposits. He recarded the Newhall deposits as rather precarious, although he admitted they have paid largely, but thinks larger deposits, in accordance with his theory of sea-current deposits, will be found away from the mountains and nearer the coast. In Ohio there are no tertiary rocks as here, hence the wells here must go deeper from 1000 to 2000 feet, down to the primary deposits, before gen—wine wells can be found. The oil and gas are forced out of the rock by pressure like cider out of an apple. If the apple were placed in a cast-iron bail and subjected to great pressure it would still be cider, though it did not escape. If then subjected to great heat it would still be cider, though it did not escape. If then subjected to great heat it would still be cider, though it did not escape. If then subjected to great heat it would become gas at the escape hole. So with oils, the oil rock, which is of a porous nature, is subjected to great pressure by the sedimentary deposit of earth and rock above it, and the oil comes out when tapped by a well. If heated it turns to gas. The sea currents did not deposit the oil evenly, but as the wind blows l'agves over a hill. sedimentary deposit of earth and rock above it, and the oil comes out when tapped by a well. It heated it turns to gas. The sea currents did not deposit the oil evenly, but as the wind, blows, leaves over a hill, putting the most on the leeward side; so the summit of a former hill in the ocean now covered by rocks and other sediments may be barren of oil, while a few hundred feet way there may be a great bed of it. The rock on exhibition from the Whitson well, he said, is of that character. He thinks profitable oil wells can be found at Pasalena or Los Angeies. The Temple-street well did not impress him so favorably as some others he had seen.

well did not impress him so favorably as some others he had seen.

After his address, the meeting organized by electing M. L. Wicks as chairman.

Col. R. S. Baker related his experience in the oil business. There is a great deal of risk in it. One well 1700 feet deep at Newhall had cost \$25,000. A number of dry wells had been bored. A well at Camilos, 100 feet deep cost \$5 or \$6 per foot. Some wells paid, and some did not; but, on the whole, they pay largely. He could not tell where to dig. Some wells yield, while others, 200 feet away, did not.

Mr. Wicks said one of the first-circulars he ever saw about Los Angeles stated that an incorporation was boring a well near the city, hoping to find one of four things—first, oil; second, gas; third, water; and fourth, sait water.

Col. Baker said that was the Banning

put down 1400 feet, and got nothing profitable.

Messrs. Ward & Clarke, well-borers, said they could not give the cost of a well from 1000 to 2000 feet deep till they knew the character of the formation they had to pass through. They are willing to bore one upon proper security if successfully accomplishing their work.

D. McFarland said a 2000-foot well would cost not less than \$10 per foot. He had put down wells on both sides of the city, and believes oil will yet found in abundance here. The daily consumption in Los Angeles city is about \$300 barrels, which is only about one-fifth of what might be used. He put down a well last year on the Brea ranch, west of the city, 1680 feet deep. After going down through the adobe, he found a layer of 5 feet of thick, heavy oil, and below that there was sand and shale, which yielded gas, and pure oil was found beneath that. It was of a much better quality than the Newhall oil, but not in paying quantities. The well was close to a large surface deposit of brea, which showed that surface in dications are not always reliable. The matter could not properly be carried on without the organization of a company which would put up about \$80,000 for expenses, to lease territory, and bore wells. One or two or more dry, wells would not portend failure. He and his associates had spent \$123,000 in boring wells in the Newhall region, only to find they were a few hundred feet out of the oil belt. An important item of expense is casing. In a 8000-foot well there might be \$8000 worth of casing. He favors commencing with a 12-

inch well at the surface and decreasing the size as it descended. He does not favor raising five or ten thousand dollars for this enterprise, as it will only be money throws

enterprise, as it will only be money thrown away.

On motion of Mr. Holloway the Chair was authorized to appoint a committee of three to investigate the petroleum guestion in the vicinity of Los Angeles city, with a view to obtaining a local supply, and report at the next meeting.

The Chair named Col. R. S. Baker, H. W. Mills, C. B. Van Every. The first two declined to serve, and he appointed J. F. Humphreys. Not finding a third, a second motion authorized Messrs. Van Every and Humphreys to select a third, and the meeting adjourned to the call of the Chair.

They saw that a thunder storm was coming up and they took to their boat and paddied back to their hotel—the Grand Central at Tahoe City—as soon as possible. Standing on the hotel veranda and witnessing the play of the storm on the lake, they saw a trand sight. First there was a waterspout, and as it swept away there came a rift in the black clouds which let in a shaft of sunlight in the water, making a spot of themost gorgeous emerald. As the clouds shifted the sunspot moved slowly across the lake. The steamer Todd Gardiner coming in at that time, the light shaft struck across her bows, transforming the vessel in appearance into burnished gold. Then it moved along to the margin of the lake, where it rested on a little island, and the trees and shrubbery were magnified to lake, where it rested on a little island, and the trees and shrubbery were magnified to immense proportions, while they looked like opaque crystals. Mr. Hamilton says it was a most magnificent spectacle.

Police Officer Jerry Comacy was before Justice Austin yesterday to answer to a charge of battery on Police Officer Lenox.

The assault took place in the Council Chamber Monday afternoon during the progress of the Cuddy investigation. The room was crowded with spectators, blocking up the doorway, and as the day was very warm, Mr. Cohn, who was in the chair at the time, ordered Officer Lenox, who was on duty in the Conncil chamber, to clear the passageway and keep it open, in order that the Council might have air. Mr. Comacy was not on duty at the time, and, with a sumber of policemen, was an interested spectator of the proceedings. Mr. Lenox, in-obedience to the orders of the Chair, proceeded to clear the passage, by pushing back the spectators on either side. Comacy was standing in the way, when asked to step back, either did not hear or did not get far enough out of the way, when Lenox caught hold of him, and was surprised to receive a severe blow on the nose, which caused the claret decumentary evidence to prove his case. He concluded by relating how Philadel-hic once went to an Indian village in Ohio a belt of wampum, emblematic of the test of wampum, emblematic of the ties and all the parts of this country should so be bound together by a bett of common interest in upholding the Republican Club, then made a few fercible remarks replete with new information to most of those present. The occasion of the gathering was a rally under the auspices of the Young Men's Republican Club, of which J. W. McKinley is president. On calling the meeting to order Chairman McKinley alluded to the accidental gloom, and to dispel it set forth Frank P. Kelly, the coming District Attorney, to serve as an 'electric or a gas light," as the occasion might prove.

The light which flowed from the genial candidate's remarks was decidedly of the electrical order, and the quiet demeanor of the audience gave way to interested attention as Mr. Kelly arraigned the Democracy in a ringing address. He alluded to the "Old Roman" having been called in by the Democratic committee for talking too much and giving the free-trade racket away to the innocent voters, and compared Cleveland's generous donation of \$100 to the Charleston sufferers with his \$10,000 bid for reflection.

land's generous donation of \$100 to the Charleston sufferers with his \$10,000 bid for reflection.

The orator of the evening, Hon. Samuel Minor from Pennsylvania, who has come to make his home in this city, was next introduced. Mr. Minor was one of the framers of the last Pennsylvania constitution, and is a well-built man, with well-marked features and gray beard. He speaks in a crisp precise manner, and his style is exceedingly clear and convincing.

Mr. Minor first alluded to the change in the character of political andiences in the last generation, commencing with those thoughtful campaign listeners who were converted by pure logic to the support of Abraham Lincoln, and he said that now, when the old issues are laid, thinking men all over the country were calmly weighing the new tariff issue between the two parties. This issue was opened by Cleveland's memorable message, the greatest mistake he ever made, and the Republicans had peomptly taxen up the gauntiet.

Then as the tardy electric lights illum-

memorable message, the greatest mistake he ever made, and the Republicans had perimply taxen up the gauntiet.

Then, as the tardy electric lights illumined the wigwam, the orator continued that the questions of how the tariff affected this or that particular lindividual's profits, or how it made the markets rise or fall at this or that particular time, were but as the ripples on the tide of the great underlying principle that protection meant production of value to the country out of that which was before valueless. He illustrated this at length by describing the development of an iron mine, the wealth flowing from it, and the labor of all forms depending upon it, all out of a barren mountain. Then he made a similar description of the borax industry. He spoke of the crowded and busy English factories and mines, the latter even extending under the sea, and proved how protection will in time fill our country with villages and towns, when mone without it can exist.

He instanced his former State of Penn-

tion will in time fill our country with villages and towns, when none without it can
exist.

He instanced his former State of Pennsylvania, teeming with industry, laced with
railroads, burrowed with films, and showed
that it was all absolutely due to protection,
and how on that issue she had sprung from
a Democratic to a sure Republican State. To
the free-trade cry that protection is unnatural and forced, he set forth the example
of California and her mountain streams of
water. It was natural to let them run in
their native channels, but the Californians
chose to divert them and protect their fields
by irrigation, and all the world knows the
result. Protection of agriculture by irrigation, like protection of manufacture by
tarif, has produced value where none existed before, and riches from poverty.

As protection thus evolves material, so
in the New England manufactories does it
evolve skill, and with the concomitant.

American energy it will defy the world.

in the New England manufactories does it evolve skill, and with the concomitant. American energy it will defy the world. Thus, he said, we see that the tariff is the essence of America.

He concluded by relating how Philadelphia once sent to an Indian village in Ohio a belt of wampum, emblematic of the tie that should bind them together. He thought that all the cities and all the parts of this country should so be bound together by a

He alluded to the fact that in the Irish-Americar. Republican Club-more than halt of the 400 members have been Democrats, and that a similar change is going on in New York and all over the country. The points presented by Mr. Wray were both novel and forcible.

THE LATEST DODGE

The Brigade of "Macs" Spring a Counter Move. The 'mac' brigade is deeply interested in the police fight, and it is claimed that they have said that they will put up any reasonable amount to see that no change is made, the money to be put where it will do the most good. A Times reporter was told last night that a meeting was held a night or two ago in a saloon on Alameda street, last night that a meeting was held a night or two ago in a saloon on Alameda street, where a purse of nearly a thousand dollars was made up for the purpose of sending a man back east to dig up the records of one or two aspirants for the position of Chief, in case Cuddy is removed, and also to look into the antecedents of several of the members of the Council. Whether such a meeting was really held, or whether this report is being circulated with a view of trying to intimidate the Councilmen and other parties taking an interest in the matter, is not known, but it is certain that such is the talk among parties who claim to be on the inside, and who say they know what they are talking about. The Chief's friends also indulge in a great deal of talk about "evidence" which is being d.g up, which, they say, will be produced at the right time, but are very careful not to give any idea of what that evidence is, beyond the statement that "if Cuddy is bad, there are plenty of others worse than he is, and they will be shown up." In fact, from their talk, one would be led to suppose that corruption was universal, and that every man in public life in Los Angeles had something in his "record" that he was asbamed of. That this is not true is shown from the decided stand that a majority, at least, of the Council, have taken in behalf of good government, and the strong efforts they are making to secure

jority, at least, of the Council, have taken in behalf of good government, and the strong efforts they are making to secure this result. Another fact that the friends of the Chief overlook is that, if that official is in possession of so much "evidence" against people, it is a little singular that he does not put it to some use, as the principal peace officer of the city, and see that the offenders are brought to justice.

About 3 o'clock yesterday morning Lugo's corral, on Santa Clara street, burned, together with 140 tons of hay, but the horses and cattle were got out. Mr. Russell says he went to the fire, and while waiting to see the engine come out, heard that it had got stuck down the road, and on going to the place was surprised to see a lot of Chinamen swinging to a hose-cart, which, he was told, was the only apparatus there was in the town for fighting fire. While the heathen were trying to get the machine out of the hole, the foreman, also a Chinamen, took a lantern and went to look for the fire, but got so interested in the sight that he failed to return.

The "epper-tree Nuisance. The pepper-tree nuisance is getting to be intolerable. In a majority of instances the trees are untrimmed, and their long branches hang down low over the sidewalks branches hang down low over the sidewalks, compelling pedestrians to take devious courses and obstructing the view. What makes them worse is the habit of sprinkling the sidewalks of an evening and dousing the leafy branches, which, in turn, bedew the passer-by with their moisture. They should be trimmed before the Odd Fellows come.

THAT FIRE

Investigations by Detective Metzler Into its Origin.

There was so much talk on the streets, Monday, after the Los Angeles Bank building fire, about incendiarism that Chief of Police Cuddy determined to investigate the matter, and detailed Detective Metzler to look into all the circumstances of the case. Mr. Metzler made a very thorough examination, and interviewed almost every person

matter, and detailed Detective Metzler to look into all the circumstances of the case. Mr. Metzler made a very thorough examination, and interviewed almost every person who was about the place when the fire broke out, among whom were Charles J. Clarkson, the janitor of the lower floors of the building; Mr. Christopher, a restaurant-keeper on Spring street; John McIlmoil, the tyler of the Masonic lodge; John Bryson and Maj. Bonebrake of the bank, and T. H. Ward, the Secretary of the Masonic lodge. All of, these parties agree that the fire was first discovered in a closet under the stairway, where a lot of rags and other combustible material was found to be on fire, but none of them went upstairs to investigate further.

Clarkson, the janitor, says when he broke in the door and saw the fire he dashed a couple of pitchers of water over it, partially extinguishing it, and then ran down stairs for a bucket, and when he came back he found that it had broken out afresh.

John McIlmoil, the janitor, says that all talk about incendiarism is nonsense, and that the fire resulted from the carelessness of some of the members of the lodges who were present Sunday, and who carelessly dropped a match or cigar-stump among the articles, and left without noticing that the fire was extinguished. Mr. McIlmoil says that no fire was used by the Masons, and there had been none in the hall for some time.

Mr. Bryson is very severe in his criticisms on the firemen, and says that if the hose had been carried to the right place, or even if the firemen had done what he wanted them to, the fire a careful inquiry and investigation, is of the opinion that the fire was the result of carelessness, and advances the following theory: On Sunday there were a number of members of the commandery in the hall, looking over the regalias and getting ready for the San Diego pligrimage. Some of the mem were smoking, and one of them carelessly dropped a cigar stump in the plie of regalias, and after finishing his search, left the place with the others. The

Late Monday night Deputy Constable

Gridley is a half-witted fellow with a fondness for horses, so much so that he has no hesitation in appropriating other people's property of that description, and is in his present trouble for stealing a horse and buggy from Ferguson, the livery-stable keeper. This is Gridley's fourth offense in the horse-stealing line. About a year ago he stole a horse, and about a month ago took another. For this latter offense he was tried, but was found insane and sent to Stockton, from which place he escaped, and nothing was heard of him until last month, when he stole a horse on Fort street, which he drove to death. He got out of this on the plea of insanity, and last Sunday hired a horse from Ferguson, which he kept out until he got tired and put it in Chick's stable. He then stole a horse from Tommy Botello's father-in-law, who lives out on the road to Pasadena, and came back to this city, where he was arrested. He will probably be returned to the asylum at Stockton.

Shall Ordinance 45 Be Amended? Pickwick Club-Very Extraordinary Enforcement-San Gabriel Valley Bank-Petit Larceny Unproven-Personal Items.

PASADENA, Sept. 4.—[Correspondence of THE TIMES.] The Pickwick Club held its semi-annual meeting last night at the clubrooms, President Bates in the chair and Mr. Craig secretary protem. The financial status of the club was reported good. A number of changes in the by-laws of the club were made and a few new ones added, ong them one in regard to a system of life membership. Officers for the nsuing six months were elected as ollows: W. U. Masters, president; Dr. F. F. Rowland, vice-president; E. H. May, treasurer; H. R. Hertel, recording secretary; C. H. Herndon, financial secretary; P. W. Hurndall, librarian, and Messrs. Ben O'Neill, B. T. Smith and E. E. Fordham, executive compilier.

The club intends to supply some entertainments for this city during the coming winter, and the matter will soon be arranged and then made public.

EXCITING BOARD OF TRADE MEETING The Board of Trade rooms were thronged this afternoon with members of the board, with interested citizens, with Enforcement Committeemen, and with Dr. H. A. Reid. The question of the sense of the board on the matter of recommending to the Board of City Trustees the adoption of amendments to ordinance 45, whereby hotels and restaurants are empowered to supply their guests with wines or other fluors at meals, came up for discussion; and, as citizens were allowed to express their opinions before the board, the meeting resolved itself into a sort of a free-for-all, informal talk, the president of the board being quite lenient in that respect, as he desired that the views of leading citizens might be known on this all-important subject. Many speeches were made and views advanced. Dr. H. A. Reid of the Enforcement Committee was heard from, and declared that when ordinance 45 was passed, it was the intention that hotels and restaurants should be allowed to serve wines, etc., to their guests at meals, and produced a circustice. of the board, with interested citizens, tion that hotels and restaurants should be allowed to serve wines, etc., to their guests at meals, and produced a circu-lar to that effect. There were evi-dently differences of opinion on several points between Dr. Reid and other gentlemen of the enforce-ment committee. After much ani-mated speechifying the board agreed to make a recommendation to the City Board of Trustees to grant the relief asked by an amendment of the ordi-nance.

asked by an amendment of the ordinance.

In the matter of the reception of the Odd Fellows, it was reported that the 19th inst. was the day selected and that arrangements would be made to secure reduced rates on the railroad, and that the collation would be spread either on shady Marengo avenue or in the new Worcester building. An appropriation of \$40 was made for two pages of descriptive matter in the souvenir pamphlet, which is to be distributed to the visiting Odd Fellows and friends. The Board of Trade having had a plethora of speech-making then adjourned.

The Daily Unior is authority for the statement that Dr. H. A. Reid of the Enforcement Committee says the committee "intend employing detectives to enter, not only the hotels and restaurants, but private houses also, and destroy liquor wherever it is found; that a man has no more right to give or dispense liquor to his friends in his own house than a hotel has, and we propose to stop it we did at the Carlton." It is to be hoped that Dr. Reid made no such remark; but, if true, and the scheme be tried, the committee and the detectives will probably strike against some snags in their rounds. The position of detective in that matter would probably not be altogether a sinecure. If correctly reported, Dr. Reid does not seem to think "a man's house is his castle," but may find it out later.

Enforcement Extraordinary.
[Pasadena Union Sept. 4.]
We have heard, during the past fortnight, frequent mention made of an interesting dialogue which took place at a prominent business house in this city, in which Dr. Reid, chairman of the Enforcement Committee, and a highly-respected and gray-haired citizen were the principals.

The conversation referred to was in substance as follows:

were the principals.

The conversation referred to was in substance as follows:

Dr. Reid entered the store in question with his subscription book under his arm, and complacently remarked that he 'had done well that day,' and then said to the gentleman who figures in this affair, 'You will give something toward this cause, will you not?'

The gentleman inquired what cause was meant, and the object of the Enforcement Committee was then unfolded to his astonished ears.

"It is our purpose," said the Doctor, "to employ a regular detective force, similar to the Pinkerton agency, and to enter, not only hotels and restaurants, but private houses as well, and wherever liquor is found it will be destroyed. A man has no more right to give away liquor or dispense it to his friends in his own house than a hotel has, and we propose to put a stop to it, the same as we did with the Carlion.

riends in his own house than a hotel has, and we propose to put a stop to it, the same as we did with the Cariton."

To this astounding proposition the gentleman remarked that he would rather contribute something toward obtaining high license, and expenses the experiment Committee's methods.

To this the Doctor, showing considerable warmth, replied: "What! you, an anti-Christ, come here and dictate what our laws shall be?"

At this juncture the old gentleman raised his caue, approaching the Doctor in a threatening manner, and said: "Sir, I am as old as you are, but I don't want you to call me an anti-Christ."

Whereupon the Doctor immediately weakened and made a hasty apology.

Third-warders. A large and enthusiastic meeting of the

Third-ward Republican League was held last evening at 133 West First street, with J. H. Book in the chair and W. W. Robinson secretary. The constitution and by-laws were adopted and a permanent organi-zation was effected with the following offi-cers: President, J. H. Book; first vice-president, Thomas Beaver; treasurer, W. W. Robinson; secretary, H. W. Edel-man.

W. W. Robinson; secretary, H. W. Edeiman.
M. H. Shepard and W. W. Robinson were appointed a committee on hall, as the present quarres are not large enough.

The league will shortly hold a grand public meeting, which will be addressed by able speakers. The league will meet at the same place next Wednesday evening. The membership now numbers 63, and at the next meeting will probably reach 100. Applications should be made early, as the charters will close in two weeks.

The meeting adjourned with three rousing cheers for the success of the Republican parity.

Immanuel Church.
A large number of enthusiastic people gathered Monday night in the hall of Les Angeles College, and about 130 of them were organized into "the Immanuel Presbyterian Church" by a committee of Los Angeles Presbytery. Dr. Chichester was called as paster at a salary of \$2000; and, although his present salary is \$4000, he has signified his intention of accepting the call, thus giving up the strongest Presbyterian church in Southern California in order to better advance the interests of his denomination in this city. Messrs. Henes, Minor, Saxton and Stewart were elected and installed ruling elders, and Messrs. Poindexter, Merriman, Hisey, Boal, Crippen and Dr. S. S. Salisbury were chosen for the trustees. Dr. Chichester will be released from his present pastorate and begin were organized into "the Immanuel Pres from his present pastorate and begin preaching in the College Hall October 21st. Immanuel Church starts out auspi-ciously, and promises to be one of the lead-ing churches of our city.

An Opulent Tramp.
Lee Silver was before Justice Taney yesterday on a charge of vagrancy, and he frankly admitted the soft impeachment, saying that he slept out of doors and saying that he slept out of doors and bunked in haystacks and odd corners as a matter of choice, and did not propose to go in-doors unless he was obliged to. The justice, won by his frankness or commiseration his destitute condition, touched him very lightly, assessing å fine of 50 cents, which he paid. After he left the courtroom Silver told an officer that the amount of fine made no difference to him, as he had plenty of money, and he proceeded to demonstrate the fact by ripping open his coat collar, from which he extracted \$600 in bills. He proceeded then to buy a ticket for San Francocceded then to buy the total sam the total sam francocceded then to buy the total sam the total sam the tot from which he extracted \$600 in bills. He proceeded then to buy a ticket for San Francisco, and gracefully sloped. Silver had been searched carefully when he was incarcerated, and all the wealth the officers found on him was \$1.50. They failed to overhaul his coat collar, whereat there is now great chagrin.

A Warning.

The modes of death's approach are various and statistics show conclusively that more persons die from diseases of the throat and ungs'than any other. It is probable that every one, without exception, receives was numbers of tuberole germs into the system, and where these germs fall upon suitable soil they start into life and develop, at first slowly, and is shown by a slight tickling sensation in the throat, and, it allowed to continue their ravages, they extend to the lungs, producing consumption, and to the head, causing catarth. Now, all this i dangerous, and, if allowed to proceed, wir in time cause death. At the onset you must act with promptness; allowing a cold to go without attention is dangerous, and may lose you you'r life. As soon as you feel that, something is wrong with your throat, lungs or nostrils, obtain a bottle of Boschee's German Syrup. It will give your mediate relief.

Coming Musical Entertainment.

Through the energy of the Catholic ladies of East Los Angeles the lovers of music and song will, on Thursday evening next, at 8 o'clock, be treated at the Opera Hall to an exquisite musical feast. The services of the Joran sister—noted for their musical talent—have been secured by Baroness Rogniat, whose guests these young ladies are. Two of them are celebrated pianists, the third a violinist, and so skilled as to elicit unstinted praise. The services of Mrs. Owens, Messrs. Walton, Borneman and Gardner, all skilled artists, have also been secured. The patrons of the concert will doubtless be much pleased. DILUTED HOGWASH.

HOW IS THIS FOR DRIVELING IDIOTORIAL IMBECILITY?

the Trombone's Able "Opinion" on the Cuddy Complication—What the "Aldermen" Did "on Yesterday"-Extracts from a Literary

From the Los Angeles Tribune, Sept. 4.1 DILATORY ALDERMEN-ON YESTER-

At the meeting of the Council, on yesterday, the report of the committee on Chief of Police Cuddy came up for consideration, when it appeared that the majority of the Aldermen did not favor instant action upon it.

THAT WAS FORTUNATE-ON YESTER-DAY.
Fortunately for the Council and for

Fortunately for the Council and for justice, and, if we were considering the Chief of Police at all—which we are not—we should say fortunately for him also, when the session opened on yesterday, a change had occurred in the minds of a number of the Aldermen, and hence it became immediately evident that extreme measures would not be taken in a hurry.

THE UPPERMOST QUESTION.

THE UPPERMOST QUESTION, The majority gave it plainly to be understood that an investigation must be had. But what kind of an investigation? That for the first hour, if not the last, of the session was the upperment energion. most question.

"S. H. WHITE." Mr. S. H. White was in the Council Chamber all through the session; was there by official invitation as Mr. Cuady's legal adviser; but when he ventured to take part in the proceedings, he was told to keep a shut mouth.

THE COUNCIL GLIDED. THE COUNCIL GLIDED.

Their report was before the Council—Gentlemen of the Council adopt the report, and turn out Cuddy neck and heels, and so end the matter. The Council did not take that view, exactly; and in a short time, without a formal vote to do so, the Council glided into a sort of investigation.

CANNOT KNOW, YOU KNOW. Until further developments are had, we cannot know if it is the purpose of the Council to investigate, under the rules of evidence that usually obtain, impartially, thoroughly.

DON'T CARE A FIG FOR NOBODY. DON'T CARE A FIG FOR NOBODY.

No great success, surely, has so far been made in the prosecution. We do not say this because we have any wish to save Chief Cuddy—we have none; we do not care a fig what becomes of him or of his prosecutors, as individuals; all we desire is that if a conspiracy exists, and has existed for a year and a half, against successive heads of the police force, that fact be brought distinctly out, together with all, the evidence pro and con in the whole case.

THE LAST THREE "CHIEF'S" OF PO LICE. Let the investigation extend to and include the Police Commissioners, and the last three Chief's of Police.

THE MAYOR'S INDIVIDUAL For a time we thought the Mayor in the right, thought him honest, but after a time we became convinced of his individual as distinct from the pub-

MR. WORKMAN "CHICANED." His personal stake in the matter in-duced him to chicane and prevaricate.

BETTER STAGGER ALONG. We have, since there was a certainty of having a new charter that will correct this evil, thought it best for the city to stagger along a few months yeunder the present vicious system with as little public scandal as possible.

OPEN UP THE WHOLE! But as some impudent people seem bound to open up a part of the dis-graceful business to the public, we make bold in the people's behalf to de-mand that if a part, then likewise the whole, be opened out for a general view.

AN EPIDEMIC OF IDEAS. Ideas somewhat like these have been spreading rapidly, the past few days, among all classes in the community, and if we are not mistaken, they will continue to spread and find lodgment in most intelligent and candid minds.

FAIR MINDED "ALDERMEN" AT THE

FAIR MINDED "ALDERMEN" AT THE VERY BEST.

When the Council again meets to resume consideration of the committee's report against Chief Cuddy, we shall expect to see the fair-minded Aldermen— at the very best, we shall expect to see them prepared to extend every right to the accused; the right to appear before them with counsel, and to call witnesses to prove his integrity.

GOING TO GROW IN THE SCOPE. We shall expect the case, when thus conducted, to extend its scope, and the popular interest in it to grow. JUSTICE MAY HAVE A SHOW, AFTER

But if, contrary to the general expectation, the case shall not go beyond Cuddy and his direct accusers, there still will be a chance for justice. THE "ALDERMEN" MORE MERCIFUL

THAN THE COUNCILMEN. THAN THE COUNCILMEN.

The Council is judge and jury both, but the Aldermen, with the whole public as spectators, may be trusted to treat no man, not even the Chief of Police, with harsh injustice.

so IT WOULD! If he had not been publicly arraigned, and it was proposed quiety to him, that would be one thing.

IT CERTAINLY MUST-ON YESTERDAY. The kind of inquisition that was begun on yesterday will not answer. It must be a trial or no trial.

Misplaced Sympathy.

The apparently endless Sharon case, which, for almost a decade, has dragged its slow length through the San Francisco courts of justice, continually unfolding fresh depths of immorality, infamy and chicanery on the part of principals, witnesses and lawyers, has now entered upon a new and startling phase-nothing less than what appears to have been a deliberately planned scheme on the part of the complainant and her huspand, first to threaten and insult, and finally to murder, Justice Field, of the United States Supreme Court, while he was seated on the bench engaged in reading his decision in the case. During the reading of the decision Mrs. Terry broke out into violent invective against the Judge, and attempted to pull a revolver from her satchel. While the officers of the court were carrying out their instructions to remove the woman from court, her husband, Judge Terry, knocked a marshal down, and subsequently pulled a dirk, with which he threatened the officers. Very promptly and justly Judge Field sentenced Terry to six months and his wife to thirty days in jail.

Strange to say, there appears to be in some quarters a feeling of sympathy with Terry in his altogether outrageous and inexcusable action. Such a sentiment on the part of respectable citizens is as difficult to comprehend as the morbid sympathy which leads delicately-reared women to carry flowers and other tributes to brutal murderers. Mrs. Terry's action was bad enough, but that of her husband was still less excusable. He is—or has been—a prominent member of the San Francisco bar: a man who is fully cognizant of the proprieties of a court of justice, and one who is supposed to be interested in maintaining the dignity of the law. There is no question of chivalry in this affair. It is simply a direct and brutal blow at what all good citizens must ever hold most dear and sacred, next to the reputation of their own families—the dignity and honor of the law, which is the expressed will of the people.

What must residents of the Eastern States think of us when they learn that sympathy has been expressed with persons who not only foully insulted but attempted the life of a chief justice upon the bench, because his decision did not suit them? The damage to the reputation of the State is, however a small matter in comparison with the evil effect upon the administration of justice throughout the country if such disgraceful outrages are to be not only condoned but sympathized SENATOR SHERMAN'S bill directed with. Even now our courts are altoof justice are to be brow-beaten and threatened in the very temple of Justice itself, what have we left to stand between us and impending social disrup-

In this connection, the Boston Journal calls attention to one possibility which has not been generally considered. The southern interest is dominant over the Democracy. The policy of free trade is essentially a southern policy. It formed a part of the Constitution of the Confederate States. Says the Journal:

Says the Journal:

Now, suppose that the Democracy should continue in control, and that the southern free-trade policy should be enacted into law. Suppose that business distress and embarrassment should follow, as they have in all the low-tariff periods of our history. Suppose that from this and other causes—particularly from large apprapriations for dredging southern creeks and erecting costly buildings at southern cross-roads—the "surplus," about which there is so much debate, should be changed to a deficit. What, then, would be the expedient resorted to by the Democracy? In the clamor for retrenchment which would arise, would any opportunity for curtailing expenditures any opportunity for curtailing expe be so congenia! and attractive as oe so congenia! and attractive as that diminishing the pension list? Given deficit, and the southern Democrats* deck, who would guarantee the pensional laws against revision and reduction?

all strikes in this country, and end short

This is a view of the case which the Democratic managers are not pressing upon the attention of the workingmen.

A MEMBER of the staff of Gov. Hill of New York, on witnessing the demonstration of liquor men in the Gov ernor's honor at Syracuse recently, said: "I tell you what, I would rather have saloons behind me in politics, any time, than churches." That was a truly Democratic remark. The opinion may be well founded in a Democratic stronghold like New York, but, taking the country as a whole, the which relies upon the saloons will find itself lamentably left.

THE Trombone has the insufferable conceit to insinuate that "ideas" sımılar to those expressed in its yes terday's idiotorial have been "sprea ding rapidly" among all classes in the community, and will continue to spread and find lodgment in most intelligent minds. It is remarkable that a journal which is so afraid of losing a subscriber should have the courage to insult its readers' intelligence in so gross a manner. "All classes in the community" are not idiots.

IT is said that all those copies of the Mills Bill which are sent out from the Democratic national headquarters. and all those which have been printed as campaign supplements of Democratic papers, agree in omitting the sections which relieve the retail liquor dealers of the Government tax and promote the making of free or "moonshine" whisky. What a precious meas-

PRESIDENT CLEVELAND'S fishy bid for Irish votes has fallen remarkably flat. The Irish-Americans have begun to think, and can no longer be driven hither and thither at the behest of Democratic bosses. With this assertion of independence on the part of Irishmen will undoubtedly come a marked falling off of sympathy on the part of the Democrats towards "downtrodden Ireland.'

THE cost of a good suit of clothes in Ireland is only \$6.56, according to a free-trade journal. And yet the Irish seem to be anxious to get away from a country where clothes are so cheap, and to come to one where they are dearer

The convention then proceeded to ballot for Governor. At 2:30 four hallots had been taken with no choice, Tittle having 306, while 316 is necessary for a choice.

The platform indorses the National Republican platform and candidates, and declares that the American doctrine of protection shall be defended against the assoults of free trade at home and abroad. We invite the cooperation of all who believe in the enactment of laws for the protection of our industries from competition incident to free importation of products of pauper labor of the Old World; of our laborers from unjust exactions of employers; of our property-owners from attacks of anarchy and communism, and of all classes from the evils of immorality and illiteracy.

On the sixth hallot there were nine votes.

I think it is universally conceded, conceded by Democrats as well as Republicans, that questions involved in this campaign have a very direct bearing upon national prosperity and upon the prosperity and welfare of individual citizens. I think it is conceded that the result of this election will affect beneficially or injuriously our great manufacturing interests, and will affect for weal or for woe the workingmen not have lost anything at all, but he admits that he gambled with the earn paired; 63 northern men voted for the bill and 141 against it. English production. That is to be the effect of it. It is not worth while to stand upon nice definitions as to free trade. Some think it enough to say that they are not free traders, because they are not in favor of abolishing all customs duties. Let me remind such that the free-trade countries of Europe, recognized to be such, have not abolished all customs duties. A better distinction is this: The free-trader believes in levying customs duties without any regar to the effect of those duties upon the wage to the effect of those duties upon the wages of our working people or upon the production of our own shops. This, then, is the issue. Take it to your homes. There are many confusing and contradictory statements made in the public press and by public speakers. Ask any of those who assail our protective system whether they do not believe that if their policy is adopted a larger amount of foreign-made goods will come into the country. It is their purpose to increase the importation in order to cheapen prices. I think I may safely ask you to consider the question whether this cheapening of prices, which they seem to regard as consider the question whether this cheapen-ing of prices, which they seem to regard as the highest attainment of statesmanship, is consistent with the rate of wages that our the highest attainment of statesmanship, is consistent with the rate of wages that our working people enjoy now; whether it will not involve, if we are to have toreign competition without favoring duties, a reduction of American wages to the standard of the wages paid abroad. Do you believe for one moment that two factories making the same product can be maintained in competition, where one pays 35 per cent. more to, its workingmen than the other? Is it not certain that wages must be equalized in these competing establishments, or the one paying the highest wages must shut down? May I not appeal to you to review these questions and consider them anew, in the light of all information that is accessible to you? If you shall do that, I do not doubt that the workingmen of this country will, this November, forever settle the question that American customs duties shall, by intention, by forethought, have regard to the wages of our working people."

THEIR REAL PURPOSE.

Blaine Handles the Prohibition Party Without Gloves FARMINGTON (Me.), Sept. 4.—[By the Associated Press.] Hon. Jomes G. Blaine addressed an audience here today, speaking principally upon the tariff. Alluding to the prohibition question he said: "Maine for the last 37 years has been un-

der prohibitory laws, but we have a party now coming in and telling us in effect that Maine had better not pay any attention to prohibition until we can organize a national party, and we can suspend temper ance in Maine, practically, titl we conver Texas and Alabama. That is precisely what this national Prohibition party means, for those who talk frankly avow that they intend to defeat the Republican party and bring the Democratic party in party and bring the Democratic party in power as a temperance movement. Thus the Prohibition party, outside of prohibi-tion, is entering into a partnership with the Democratic party to defeat the Republican party, if that were possible, in Maine; to elect that saintly embodiment of prohibition and temperance, David B. Hill, Governor of New York and all over the country to elect that saintly embodiment of prohibition and temperance, David B. Hill, Governor of New York, and all over the country to stab the Republican party in the back and in the dark in order, they say, that the Democratic party shall be brought into power. Then there will be a reaction against the Democrats, and by some political process, of which the workings is not yet apparent, the national Prohibitionists will come into power. Fellow-citizens, the Republicans of Maine have worked many years in and for temperance reform, and years in and for temperance reform, an will not turn back from the good cause."

BRAVE OLD GLADSTONE

His Voice Still Raised in Behalf of the Oppressed.

London, Sept. 5.—[By Cable and Associated Press.] Gladstone, in a speech at Wrenham today, said that the Times had one him an unexampled complin answering a speech not yet delivered. He had no wish to interfere with the natural and legitimate performances of the Times in throwing dirt upon him. He remained strong in the opinion that the criticisms of a man's enemies were more useful than the cheers of his frieads. He maintained the truth of his former statement the truth of his former statement that he had seen a political prisoner in Naples better treated than were the imprisoned Irish members of Parliament. It had not been denied that some of the Paraellites had broken the law, but the framers and administrators of that law were more guilty than the Parnellite offenders. He would not say that imprisonment had killed Mandeville, yet he declared that Mandeville was used in a manner that disgraced the Irish government, and any government wille was used in a manner that disgraced the Irish government, and any government in the world would be disgraced that did the like. While on the subject of the treatment of political offenders, he observed that it was seldom that he was able to speak with satisfaction of the policy of Austria, but he had learned with the greatest satisfaction that Austria had given liberal home rule to the Galician Poles, and in that respect she was far ahead of England. Referring to Welsh sympathy with the Parnellites, he said that the people of Wales would not be losers by the present agitation. They would find that the Scotch, who were a determined people, were with them when there came a demand for a solution of the Welsh question. That demand could not be made until the Irish question was disposed of.

The Man Hammond The Santa Barbara Press of yesterday contains the following about Hammond, whose arrest in this city was chronicled by THE TIMES:

The Times:

"A. B. Hammond, who sold ice cream at the fair grounds for J. E. Tapley, suddenly took his departure for Los Angeles last Saturday afternoon and left quite a number of creditors in the lurch, among whom are Mr. Tapley, whom he owes from \$90 and \$100. Hammond went as far as Montectto by private conveyance and from there took the 4 o'clock train for Los Angeles. A dispatch was wired Saturday evening to the authorities at Los Angeles requesting them to hold Hammond, and Sunday morning Mr. Tapley swore out a warrant charging him with embezzlement. A dispatch was received Sunday morning from Los Angeles stating that Hammond had been arrested, and Officer Van Valkenberg left on the regular train Sunday afternoon to bring him back to this city. feeling of awe with which he had heard of his first nomination had now been intensified.

Mr. Plumb said that he could understand that remark in view of the pulling and hauling of the dirty-sock Democracy which had been hungry for 20 years. He also prought up the circumstances connected with the removal of District Attorney Benton of Missouri and District Attorney Stone of Pennsylvania for neglecting their official duties in order to make partisan speeches, the former having been reinstated through the efforts of Mr. Vest, although Benton had maligned the Administration, while the latter, who had not maligned the Administration, while the latter, who had not maligned the Administration, had not been reinstated. He merely wanted to show that the comparison brought forward yesterday by Mr. Vest to show the impartiality of Cleveland did not compare.

In Mr. Vest's reply to Mr. Plumb he called the Benton and Stone matter "a threshing out of old straw," and incidentally the politics of the St. Louis newspapers (from which Mr. Plumb had quoted extracts) were brought in. Mr. Vest then referred to the Foster circular containing the remarks of the Republican Senator as to "frying the fat" out of protected manufactures, and said that if the Senators were to indulge in crimination and recrimination, it would be interesting to know what Senator had made use of that language. The two Senators from Vermont had denied that they had made such a statement, and the question now was, who had made it? When that question was answered he (Mr. Vest) would go further in the details of the pending campalgn.

Mr. Resgan denounced the Republican party for its legislation on the greenback question and silver-colnage question, and was followed in the saind girection by Mr. Stewart, who expressed his sympathy with the views expressed by the Texas Senator.

Mr. Stew rt, in that connection, deplored the possibility of Cleveland's election, which would, he said, prevent relief on the silver question in tye next four years, because Cleveland wa

things which are all that we things reconciled him with his party. He knew that Cleveland would veto a bifl for the free coinage of silver, and that Harrison would so tveto such a bill.

The Republican candidate for the Preside ncy had occupied the same position on the Chinese question as he (Mr. Teller) had always occupied, and was as sound as any man in the world on the question of protection to American labor, whether against the pauper labor of Europe or the pauper labor of China. Mr. Teller proceeded to compare the course of the two parties on the Chinese question in California, the only State where that question had crystalized into public opinion, and claimed that the Republican party there had always been opposed to Chinese limingration, while the Democratic party had not been. Gov. Stanford's message to the Legislature in 1862 had been the first official declaration against it.

Mr. Payne inquired whether the Central Pacific Raiiroad Company, of which Stanford was president, had not imported Mongolians to build that road.

Mr. Teller: No, sir, uor any other railroad company. They came to California of their own accord.

As the Senator from South Carolina (Mr. Butler) had said yesterday, with great frankness, the bill was a political movement. He did not find it stated in the Record that the bill had been drawn in the office of the Solicitor-General, but had heard it so stated outside, and that it was sent down from the Executive Department to be passed. If he were to look over the House to select the man who most filly represented the American people who toil, he would hardly have selected the man who had succeeded in getting that bill through the House. He had only succeeded because he represented the President more than any other man in the Democratic party. It was said of him (Mr. Scott) that he had given ten times as much money to the Democratic campaign fund as the President had given. He was able to do so, as he was said to have made a million out of the laboring men of the country. In this connection Mr. Teller sent to the leart's desk and had read Scott's autobiography sketch in the Congressional Directory.

additional facts. He would name the member when he appeared before the committee.

Mr. Blount of Georgia intimated that this charge was brought at the instigation of Mr. Smithmeyer as an offset.

Mr. Kelley declared the offering of his resolution his own act, the result of his own cool, caim and long-intended purpose to have the country know some of the facts that came to his knowledge early in the session. Neither Mr. Smithmeyer nor any other human being than himself was responsible for the conception of the charge or manner in which it has been made. He alone claimed all the honor or all the disgrace.

Finally, it was decided that a new committee should be appointed, in being intimated that the member referred to by Mr. Kelley was a member of the present committee.

Mr. Townshend of Illinois submitted a conference report on the Army Appropriation Bill. An agreement was reached on all amendments except those relating to the establishment of a gun factory and manufacture of ordinance. Further conference was ordered.

The House took up the Retaliation Bill. Mr. Belmont of New York, chairman of the Committee on Foreign Affairs, opened the debate by recalling the fact that he introduced a bill last year similar to that under consideration, approving the terms of the pending measure, and recommending its passage.

Mr. McGreary of Kentucky said that the

duced a bill last year similar to that under consideration, approving the terms of the pending measure, and recommending its passage.

Mr. McCreary of Kentucky said that the President's views, as expressed in his message, should be upheld by the country. That message, together with the message on the tariff, would be remembered torever. The President would have been subjected to criticism if he endeavored to ret diate against Canada without special authority. Mr. McCreary discussed the motive of the various treaties, and touched upon the outrages committed upon American fishing vessels by Canadian officials.

Mr. Hitt of Illinois commented upon the fact that the President's fisheries message had been received with partisan applause, and that one Democratic member had declared that it was a known as the free trade message. It was an apt combination. The gentleman from Kentucky (Mr. McCreary) connected the message on the fisheries with what was known as the free trade message. It was an apt combination. The treatment of our fisherman and the tendency toward free trade had gone hand in hand since the day of inauguration. Was there any one who could forget the indignant feeling of 1886 at the scene from tweek to week of American shiperment. The whole story was one of wrong and outrage, wrong unredressed and insult unany and of inhumanity to American fisherment. The whole story was one of wrong and outrage, wrong unredressed and insult unavenged. Congress had taken the matter up and passed and none of the powers conterned to the subject of the country rejected to a severe debase and found wauting. The opinion of the country rejected to a severe debase and found wauting. The opinion of the country rejected to a severe debase and found wauting. atives, the policy of the Democratic party, will'at once take an onward march in the direction you propose, and accomplish steadily that which you desire." Sir Charles Tupper then added: "These were the utterances of the distinguished statesman who pointed to the avowed policy of the Government of the United States." Sir Charles Tupper then called attention to the position of the Mills Bill, and says that the ink is barely dry on this treaty before he, as a representative of the Government, brings ferward a measure to make free articles which Canada sends into the United States, and on which last year \$1,800,000 of duty was paid. "Let me add," said Mr. Hitt, that he not only introduced the bill, but passed it through the House. He kept Bayard's word to the letter. The Democratic party stood by its bargain with the British plenipotentiaries. The gentleman from Texas is starring the provinces, carrying on a great campaign, and I observe the report of a remark by

The gentleman from Texas is starring the provinces, carrying on a great campaign, and I observe the report of a remark by him that 'While the Republicans may have taken the British lion by the tail, we take him by the snout.' That was after he had crammed the British lion's mouth with \$1,-800,000 a year—a sheer gift."

Mr. Shipman of Michigan favored the bill. He said that the foot of England had been on every weak neck. Everywhere she had been selfish and pitiless. She was the monster moneychanger in God's temple on earth. What the people of eur country required he would concede to her and not an atom more. This bill was in the pathway of duty, and he would vote for it with a stout heart and clear conscience. Adjourned.

WASHINGTON NOTES.

An Important Discovery Bearing on Hetaliation. WASHINGTON, Sept. 4.—[By the Associ-ated Press.] Senator Cullom's resolution of inquiry, offered and adopted by the Sen-ate today, calling upon the Secretary of War for information as to whether the St. Clair Flats Canal lies in whole or in part in Canadian Territory, is based upon unoffi-cial, but trustworthy information, which has come to him as chairman of the com mittee to investigate our commercial relations with Canada. Though the resolution refers only to the St. Clair Flats Canal, the Senator has infor-mation which leads to grave suspicion that mation which leads to grave suspicion that the Detroit River near Amherstburg and the Sault Ste. Marie Canal are also in par in Canadian territory, a fact, if it be a fact which has an important incidental bearing upon the matter of retaliation.

SHERMAN'S TRUST BILL.
Senator Sherman's bill directed against trusts was considered by the Senate Committee on Finance, but no action was taken. The tenor of the remarks indicated approval of the general principles of the measure by the committee.

MISCELLANEOUS MATTERS. The Secretary of the Treasury today directed the forfeiture of the contract with E. F. Goebel of Chicago for the construction of the postoffice building at Brooklyn, and the forfeiture also of \$1000 which accompanied his bid. This action is based on the failure of the contractor to furnish security in the sum of \$100,000 for the performance of the work.

He said that the fact that Canada was a part of the British Empire enabled politicians bidding for the Irish vote to use the questions involved for party purposes, but even this was not an unmixed evil, if it raised the consideration of the question of the relations of the two countries from in-difference to one of prime importance. Diplomacy had failed to settle the fishery puzzle. Retaliation would fail equally to settle this dispute or readjust the transportation question. The practical plan is for unite the two countries commercially. This, it is claimed, can be done by exacting a uniform tariff, and instead of having a customs line running athwart the continent it should be lifted up and put around the continent. involved for party purposes, but even

Tonight a Coroner's inquest was held, and the verdict was that he was a German called "Shorty," whose true name was unknown, and that he had evidently been murdered. A man named Tom Kerwin was charged with assault with intent to commit murder. Kerwin and aman named Fisher have since been arrested. Kerwin and Shorty had a quarrel in a saloon, and Shorty was knocked down and kicked by Kerwin. It is believed that Kerwin dragged Shorty to the barn and set fire to it.

WASHINGTOLL, Sept. 4, 1888.

Hon. P. A. Chlins, Chairman National Democratic Commit. ec. and Others—
GENTLEMEN: It is with 'ec lings of the most profound gratificatio u that I have been officially informed on' the fact of having again been selectual as the standard-bearer of the De nocratic party in the approaching contest. It is not only the unanimous vote of the convention, but also the method of my nomination—and, a method wit hout precedent, in being selected first, a fter which the less important work of firs ming a platform was attended to—which disables me from expressing my sent ments.

ments.

This manner of my nomination implies that all views and principles must be subservient to the one of success of the party. As I was the first to lead it to victory—thanks to accidents and alliteration—after a continuous series of defeats for 24 years. I may well claim defeats for 24 years, I may well claim that individual preference, and opix ion in opposition to mine cannot be toler-ated; and it was but a just tribute that the party should adont my views as the

HAPthe only representative of successions and the conventiou, I am happy to state acted wisely in apreciating that fact, with innocuous desuctude. In that light, all charges of iny inconsistency made by the opposition must be regarded as trivial. While it is true that in my letter of acceptance of the first nomination, I commented upon the danger of a president becoming a candidate for a second term and using the parronage of the office for that purpose, also promising and preaching pose, also promising and preaching civil service reform, yet it is apparent that all such statements and promises made before election must necessarily be considered in the light of surrounding circumstances only. The great object to be obtained four years ago was success. This is the object now, and the party well comprehend that all reformatory declarations must necessarily and obviously yield to practical considerations.

erations.

In view of the undisputed proposition that the doctrine of the party is that the majority should rule, it is apparent that that particular section of the country which furnishes a majority of the electoral votes, and without which success would be impossible, is entitled to be favorably considered in its demands, that its special interests should be protected, and that, in fact, it should exercise a controlling influit should exercise a controlling influence. As an authoritative declaration of its desires, we may look to that instrument which was formulated by it when untrammeled by the North. I allude to the Constitution of the by it when untrammeled by the North. I allude to the Constitution of the Southern Confederacy, which declared for free trade, and prohibited any tolf on the import of foreign goods. I have called the attention of Congress, in my December message, to that policy, and I am happy to perceive that many, if not all, the Representatives of the North have surrendered their former opinions and the interests of their constituents to the wishes and demands of the opposite section. This will result in some retribution for southern losses during the war, and in that view it is but reasonable that the products of the South, such as rice and sugar, should be protected by a high tariff, while the tariff on wool, lumber and other products of the North should be abolished. I am also happy to be able to place on record the enthusiastic approval of Europe, and especially of the English people, of this policy of mine, and they are anxiously awaiting the day when the same will result in such legislation as will give them free access to our country without fear of competition will enable them to undersell our own factories. Such approval and support of the most emineut foreign statesmen

factories. Such approval and support of the most eminent foreign statesmen of the most eminent foreign statesmen is well calculated to compensate for any grumblings of the opposite party, and to make my heart swell with pride. Having been elected under the promise of reform. I look with exultation upon the fact that I have vetoed more bills passed jointly by the Democratic House and the Republican Senate than all the prior Presidents, combined, have ever done.

In view of the immense surplus in the treasury I have taken special pains that not a cent should go to any widow or orphan of any Union soldier unless the chain of evidence was so strong and convincing that not a flaw could be found by the shrewdest and most ex-perienced lawyer. These claimants have no rights, but come to beg, and the plea that in most of their applica-

the plea that in most of their applications proof beyond a reasonable doubt cannot be furnished by reason of the length of time elapsed and the poverty of the applicants, is not entitled to any consideration whatever.

While strict to our own citizens, I have not forgotten the obligations to our mother country, and while I concluded a treaty with England, such as was desired by that country in relation to our fisheries with Canada, yet I have seen proper, upon its rejecyet I have seen proper, upon its rejection by the Senate, to assume a bold front, with the sole views to pacify and conciliate our Irish-American citizens, who have of late shown a spirit of independence and of thinking and acting for themselves, not to be telegrated in

dependence and of thinking and acting for themselves, not to be tolerated in a well-disciplined army of voters, as I intend the Democratic party to be.

With these views, which I trust the party will make their own, I again assume the position of leader of the Democratic party, believing that blind partisanship and self-interest, as well as desire for effice, will gain sufficient votes in the North, when combined with the solid and always trustworthy. OUR PREMIUM

HIGH-ARM

SEWING - MACHINE!

TESTIMONIALS:

"GIVING PERFECT SATISFACTION."

J. W. Ross, Pasadena, writes: The TimesMirror Sewing-machine is giving perfect satisfaction; in my opinion it is as good as any
85 machine. 1 have not done any heavy work on it yet, but I think it will do it all right.

"HIGHLY PLEASED WITH IT."

Mrs. Edwin Brown, Los Angeles: In reply to yours of 28th would state that I am highly pleased with the Premium Sewing-machine I received with the Mirron. Gives every satisfaction; so easy to learn how to manage; does such excellent work; in fact cannot praise it too much, and would not take twice the amount it cost me.

W. C. FURREY,
Builders' Hardware!

Mrs. S. A. Ware. Pasadena: I have used the better we like 1. The more we use it the better we like 1. On find heavy work it is splendid. We have tried the attachment. In fact it goes ahead of your advertisement so far.

THE MORE WE USE IT THE BETTER WE LIKE IT.

."LIKE IT BETTER THAN THE \$125 SINGER."
Joseph Wilson, Los Angeles: The machine
gives entire satisfaction. My wife likes it
better than the \$125 Singer that it has replaced.

"GIVES GOOD SATISFACTION."

S. W True. East Los Angeles: We have the High-Arm Machine and use it for light family sewing. It gives good satisfaction.

RUNS SMOOTH-AND SEWN EVERYTHING BUT

"BUNS SMOOTH—AND SEWS EVERYTHING BUT BUTTONS."

William P. Wade. Los Angeles: The report of the chief engineer of the sewing department of my demestic establishment is to the effect that the sewing-machine lately furnished by you for \$22 arrived in good order and in due time, and has given entire satisfaction. It runs lightly and with very little noise and performs to perfection all kinds of sewing werk with the exception of buttons. [When the freight is paid to Los Angeles by the Times-Mirror Company the price is \$25,58.]

TRIED 'EM ALL AND LIKES THE MIRROR MA William L. Price, 218 Temple street, Los Angeles: My wife tried several \$75 machines, and chose the Mirror Premium Sewing-machine as an equal to the best in the market, for one-fourth of the money. It is perfect in all particulars, and admired by all who see it. My wife has been paint it several months, and My wife has been using it several months, and we both cheerfully recommend it to the pub-

'SAME IN WOREMANNIES AND MATERIAL AS THE HIGH-PHICED ARTICLE."

C. E. Spencer. Los Angeles: Having sold hundreds of the Remington Sewing-machines for \$85, which you are now offering with the WEEKLY MIRROR at \$22, [\$25,50 when freight is paid to Los Angeles]. I wish to say that the machine you offer is identically the same as the high-priced article, both as to material, workmanship and capacity. Being a resident here and an experienced sewing-machine man, I will take pleasure in instructing any one in working the machine, in this place or vicinity.

Mrs. J. W. Stringfield. Pomona: The High-arm Mirror Sewing-machine came in good time in excellent condition, without scratch to be believe the machine is all that you recom-mend it to be, and think it a rare opportunity for those who may want a machine to get a first-class one cheap.

"PERFECT IN EVERY RESPECT."

Mrs. B. C. Cranston, Norwalk: The High arm Premium Machine arrived in prime condition, and is perfect in every respect. Freight \$2.50, with first cost added, making \$2.50 for as good a machine as is usually sold through agents for \$75. Well pleased, 1\$25.50 when freight is paid to Los Angeles.]

"VERY MUCH PLEASED WITH IT." "YERY MUCH PLEASED WITH IT."

Mrs. Martha Allison, Downey: I am very much pleased with my machine as far as I have used it, and feel safe in saying that I have just as good a machine as if I had given 686 for it. Shall advise any of my friends to try this before buying any other, as I think it is fully as good as represented.

"RUNS LIGHT AND EASY - DOES ITS WORK S. M. Shaw, Pasadena: I can say in regard to the machine that it is well liked. It runs light and easy, and does its work well. It is a very cheap machine at the price you fur-nish it.

"EQUAL TO THE BEST SHE EVER USED."
William T. Parcel, Compton: The High-arm
Sewing-machine ordered from your company was received in good order, and Mrs. Parcel says it is equal to the best of any other kind she has everused.

"PROVES SATISFACTORY."
W. F. Beadley, San Gabriel: The sewing The sewing proves satisfactory.

WIFE THINKS IT THE BEST SHE EVER USED. J. W. McLellan. Tustin City: We received Premium Sewing-machine through your office, and my wife thinks it the best she ever used: consequently are well pleased.

SUPERIOR IN SOME RESPECTS TO THE BEST. S. A. Mattison, Los Angeles: My wife and daughter are well pleased with your Times-Mirror Sewing-machine. They have used sev-eral of the best makes of machines, and yet eral of the east makes of machines, and yet say your machine is superior in some respects o those they have used, and in no way inferior. They were at first afraid, as many are, nowdoubt, that it is too cheap to be first-class, but are now satisfied that it is as good as machines costing three or four times as much

"TIGHTENED THE SCREW AND SHE RUNS ALL

L. A. Myers. Newhall: Yours of the lat inst. received. Will say in reply that soon after I wrote you I discovered the cause of the trouble. The little tension screw in the shuttle head worked loose and was nearly out, and the shuttle thread, in sewing fast, would catch on the *crew and break. I tightened the screw and it now works like a charm; go more breaking thread or irregularity of stitch.

ONE OF THE BEST INVESTMENTS THEY EVER Mrs. U. L. Shaffer, Orange: We received our High-armed Sewing-machine in good order, and I am very much pleased with it, and consider it on: of the best investments we ever made. It is nicely finished, and runs stiong and light doing nice work. An one needing and light doing nice work. An one needing than invest 22 in the machine and Mirkon, or \$2.50 when the Company pays freight to Los Angeles.]

MORE THAN SATISFIED AND GLADLY RECOMMENDS IT."

Martha M. Shaffer, Orange: I thank you for sending to me for testimonials, as I have set my new machine in the partor without even threading it, as I was very busy and had a good machine ready for work and used to running. So I did not take time to do anything with the new one until I received you letter. Then I brought mine and went to running it to test it. I was more than satisfied, and gladly recommend it to those who need a machine. I then I would have gained time to have used it long ago.

"EQUAL TO ANY 865 MACRINE."

Mrs. A. W. Worm. Loe Angeles: For the benefit of those who state 4i need of a good sewing-machine. I will say that after using the Fremium Machine for a bout four months, I find it equal to any 865 mag h.ne I have seen

Harry G. Johnson, a lad 15 or 16 years old, is in trouble, and will have to answer to a charge of battery in Justice King's court. Harry blaims that, with a companion, he entered a biacksmith shop, at No. 6 Church lane, and he says the other boy started up a fire in the forge. Edward F. Prano, the owner of the shop, coming in and finding the boys medding, proceeded to give Johnson a threshing. Johnson took up a rock and smashed the blacksmith on the mouth with it. Hence the charge.

A man named Ellenberger, who lived at Etiwanda and owned a ranch of 400 acres near that place, lost his life, Monday night, by jumping from the west-bound Santa Fétrain. Ellenberger had bought a ticket for Etiwanda's but was told that the train did not stop there. He prevailed upon the conductor to slow down for him, but before the train reached the siding he jumped, while the train was going at the rate of 25 miles an hour. He jumped in the dark, and whether the car struck—him or not is not known, but his skull was broken in and his body otherwise terribly bruised and mangled, resuiting in his instant death.

The Millard lodging-house; at the corner of East Fourth and Los Angeles streets, was thrown into a state of wild excitement Monday night by an outraged husband catching his wife in a compromising position and throwing the man in the case down the stairs. The husband is Andrew Fletcher, a middle-aged engineer, and the gay Lothario is a little tailor by the name of Weister. Fletcher called at the house about 10 clock, and went to his wife's room. The light was not burning at the time, and he went in without knocking, discovering Weister on the bed and his wife close by. Fletcher grabbed Weister by the throat and, after choking him severely, fired him headlong down the steps, when he made off. Fletcher says he will not live with his wife again, but will send her to her parents in Illinois.

A TESTIMONIAL From the Main and Agricultural Park Railroad

We have used Dr. Flynn's Blood Purifier for the horse and his Maud'S. Luiment for about two years These medicines have been constantly in use for the treatment of indisposed lame, bruised or otherwise injured animals. They have been found efficacious, certain and ind spensable, and have relieved the company of the expense attached to the employment of a veterinary surgeon. We would not be without them and cheerfully recommend them to the owners of horses. E. M. Loricke, Surcrintendent.

Dr. P. H. Flynn, 104 North Main street,

TO THE PUBLIC.

The Bituminous Line Rock Paring and Improvement Company
Take this opportunity of informing the citizens and property-owners of this city that the pavement laid on Main street, between First and Third streets, is nor bituminous lime rock, but is an artificial mixture, and nor hild by our company. We make this announcement for the purpose of disabusing the minds of those who entertain the belief that this pavement was laid by this company, and are disposed to criticise our material as being soft and not suitable for the streets of this city. The only bituminous lime rock pavement here was laid by this company, and extends on Main street from the south line of Third to Ninth street, and on Spring street from Temple to Ninth street. Bituminous lime rock does not become soft and mushy unter the best of the sun but layers. does not become soft and mushy under the heat of the sun, but always remains firm and elastic. We have already laid on the streets of this city about 500,000 square feet of this pavement, to which we take pleasure in invit-nz inspection. Very respectfully yours, Bituminous Lime Rock Paving and Improve-ment Company. ment Company,

J. A. FAIRCHILD,

Absolutely Pure. This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low-test, short-weight, alum or puosphate powders. Sold only in Cans.
